I have an issue about civil rights that I feel that Mr. Wilson will be interested in, and hopefully will share the same concerns that I do. This is a civil rights issue that is rarely touched on and is not well known, but I'm sure the term is at least somewhat familiar—conversion therapy. It poses a serious threat to the physical and mental health of teenagers in the LGBT+ community. It is an atrocious act that is still legal in this nation, and I hope that Mr. Wilson will understand and take into consideration the proposal to take action and end conversion therapy. I'm only 17, just a senior in high school, but I still feel this is an issue that urgently needs resolving. Thank you so much for your time!

Subject: Conversion Therapy

Good Evening,

I urge you to do everything in your power to ensure the extremely damaging practice of conversion therapy is not being practiced in the state.

Conversion therapy refers to the practice to change and help "cure" someone's sexual orientation. Sadly, this practice is used on minors, who have no legal authority to make their own medical decisions. These practices lead to depression, decreased self-esteem, substance abuse, suicidal behavior, and frequently result in suicide. That is why physiological, medical, and counseling associations are against this practice.

The associations also agree that this practice is ineffective, as well as extremely harmful, and damaging to individuals that go through these programs. A few of these organizations include: The American Medical Association, American Psychological Association, American Counseling Association, National Association of Social Workers, and the World Health Organization.

Without question, there is very clear evidence that conversion therapy does not work and only traumatizes patients more. Several states have passed laws banning licensed therapists from subjecting minors to such treatment, and I urge you to join the movement. Please do everything in your power to prohibit state-licensed mental healthcare providers from advertising or providing "conversion therapy" or "pray away the gay" therapy to anyone under the age of eighteen.

Thank you very much for your time and consideration,

Caleb Laieski
National Advocate for the LGBT Community, Public Safety, and the Environment

Today in History

At the end of a sensational trial, former football star O.J. Simpson is acquitted of the brutal 1994 double murder of his estranged wife, Nicole Brown Simpson, and her friend, Ronald Goldman. In the epic 252-day trial, Simpson's "dream team" of lawyers employed creative and controversial methods to convince jurors that Simpson's guilt had not been proved "beyond a reasonable doubt," thus surmounting what the prosecution called a "mountain of evidence" implicating him as the murderer.

Subject: From Sharon Kass to the People of North Carolina re "Transgenders" and Rights
Message-ID: <AABMRVDGLAHEVG7J@smtpout02.vgs.untld.com>

March 28, 2016

To the People of North Carolina:

Concerning the ACLU, et al., federal lawsuit against HB 2, which maintains that the biological sex of a person, and not any "gender identity" which differs from this, will determine that person's use of the men's or women's public bathrooms, locker rooms, or the like:

Please be advised of the following:

- o Neither homosexuality nor gender identity disorder ("transgenderism") is inborn.**
- o The key causative factor in both of these psychosexual disorders is faulty bonding and identification with the same-sex parent, starting at or before age two and leading to deep-seated gender-self-alienation of some kind, to some degree. These disorders also have the features of depression, anxiety, narcissism, and rage.**
- o This being the case, they are both preventable.**
- o With state-of-the-art depth psychotherapy, they are both treatable.**

o The Left, including the psychiatric Left, has long exploited sick people for political advantage.

o Nevertheless, the truth is reaching more and more Americans. For further information and help:

Sharon Kass, "Conservatives' Ex-Gay Phobia"

Article 1, Section 2 of the North Carolina State Constitution establishes the sovereignty of the people. Nowhere in the United States is it just for the Leftist propaganda of the American Psychiatric Association and kindred organizations to be taken at face value as "contemporary science" by government at any level. What the national knowledge industry has done now for half a century is to give cover to a pack of absurd lies, assuring that the real facts about these disorders would never be a weighty part of public discourse, especially that in governmental settings. The whole "gay is the new black" movement drives and is driven by the violation of the people's sovereignty. It is up to the people to rise up against this scourge--*now*.

I have been doing ex-gay activism for eighteen years. I would be glad to advise you further on strategy and messaging. Your leaders have long betrayed you. The people must unite, fight, and, in time, win.

Thank you, and may God bless your undertaking,

Sharon Kass

Subject: Why conversion therapy hurts all of us:

Across the country, there are doctors working to convince people to change their sexual orientation or gender identity. It's known as "conversion therapy," but it could also be called brainwashing, or reprogramming.

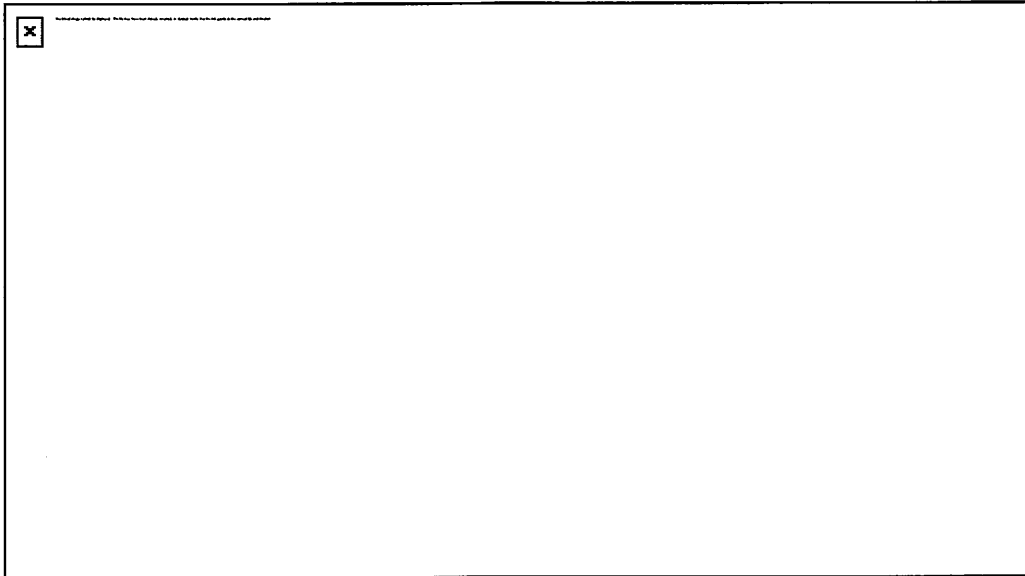

Loving and compassionate parents and ministers who are trying to do the right thing are doing just the opposite. They are influenced by bad science, not grounded in fact. This so-called "conversion therapy" is harmful.

A couple of days ago, the White House came out in support of efforts to ban the use of conversion therapy. And as a transgender woman, this is especially personal to me.

No one should be forced to be someone they're not. Everyone should be valued for their authentic, true self -- who they are -- regardless of the gender with which they identify, or who they love.

I recently talked with a few other people in the Administration about why conversion therapy is so dangerous, and why it was so important for the White House to take a strong stance against the practice.

Here's what we have to say:

This isn't just a transgender issue or an LGBT issue -- it's an American issue. Our nation was founded on the ideals of equality and acceptance for everyone, and forcing an individual to be someone they aren't goes directly against what this country stands for.

If we're going to grow as a society, we must move beyond the way things are, to the way things should be.

That's why I'm glad our Administration is standing up and making it clear that conversion therapy is unacceptable. Our society should allow every child and every person the freedom to be whoever they aspire to be.

And we've already seen the tragic effects of this therapy. Countless people have taken their own lives because they feel they can't fit into the standards that society demands. Others, although they haven't lost their lives, have been forced to live unfulfilled lives and to repress their feelings in the process -- feelings that come out in other ways that we can't always anticipate.

We can be better than this. We **are** better than this. We owe it to ourselves, and to all of the children growing up in this country, to work toward a society where everyone is accepted and treated equally.

I hope you'll take the time to listen to what we said, and learn more about why the White House came out in support of banning conversion therapy.

Thank you,

Amanda
